The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/764,784

Applicant(s)

CONNELLY, MICHAEL P.

Examiner

Andrew Kim

Art Unit

3714

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10/17/07.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 26 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

This office action is in response to the amendment filed on 10/17/07 in which:

- Claim(s) 1.8.15.16.17.18 have/has been amended.
- Response to claims rejection have been filed.
- Claim(s) 1-18 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishibashi (US 5,695,188) in view of Landis (US 2004/0235545 A1).

Claims 1, 8, 15, 16, 17, and 18. Ishibashi discloses a computerized gaming system, comprising: a gaming module, comprising a processor and gaming code which is operable when executed on the processor to conduct a wagering game on which monetary value can be wagered; and an audio module (col. 4:43-67), the audio module operable to play audio cues to direct the visual attention of a player of the gaming system, the audio cues comprising a directional, moveable audio representation of the physical location of a game element presented on a video screen (col. 10:20-24) by variation in at least one of pitch, instrument, rhythm, volume, echo, phase, and panning (Abstract).

Ishibashi may not explicitly teach a directional, moveable audio, instead Ishibashi teaches certain sounds when certain sounds are in a certain region of the display. However, in an analogous audio reference, Landis teaches directional, moveable audio to play a game in which may involve visual cues which are synchronized with the different audio cues and which aid the player when the visual cues are displayed on a display device (Abstract). One of ordinary skill in the art would have seen the benefit of modifying Ishibashi with directional audio to further entice players to play the game because when the more senses that are stimulated, the more immersive the game may be which can increase player appeal. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Ishibashi with directional audio to stimulate the player more and increase player appeal.

Claims 2, 9. The computerized gaming system of claim 1, wherein localized sounds

comprise sounds representing only a portion of the video screen of the gaming device (Abstract). The sounds represent the payline.

Claims 3, 10. Ishibashi substantially discloses the invention as claimed but fails to explicitly teach wherein pitch varies with vertical position of directed visual attention on the video screen. Instead, Ishibashi teaches generating sounds when each of the plurality of symbol columns is moved and stopped. However, it is well known to change the pitch of a sound with respect to its vertical position. For example in reading music, to indicate a note of a high pitch one would look at the notes at the top of the scale. Another example is the sound when a pogo stick hits the ground. Boing. One would obviously associate the high pitched sound for when the pogo stick is higher in the air. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the instant invention to incorporate wherein the pitch varies with vertical position to notify the user where to direct his attention.

Claims 4, 11. The computerized gaming system of claim 1, wherein the audio cues indicate the payline in a video slot gaming machine (Abstract).

Claims 5, 12. The computerized gaming system of claim 1, wherein at least one of instrument or phase changes to represent different reels where the gaming system is a multi-reel video slot machine (fig. 7, Abstract).

Claims 6, 13. The computerized gaming system of claim 1, wherein the variation in at least one of pitch, instrument, rhythm, volume, echo, phase, delay, and localized sounds is further accompanied by panning to represent horizontal position on the video screen (col. 3:40-67). Panning has been interpreted as vertical panning.

Claims 7, 14. The computerized gaming system of claim 1, wherein multiple audio cues are presented at the same time (Abstract). When the reels are rotating at the same time, the audio cues will be sounded at the same time.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3714

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Kim whose telephone number is 571-272-1691. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Xuan Thai can be reached on 571-272-7147. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
